

Datasheet

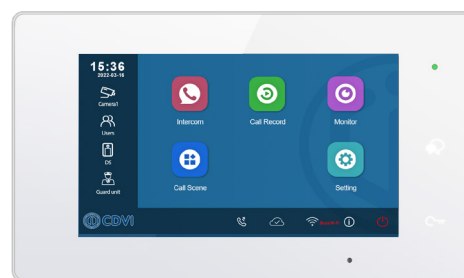

2E-MON/W - Indoor monitor with remote access

Product Description

The 2E-MON/W is a 7" HD touchscreen indoor monitor with integrated WiFi for the 2EASY Hybrid video entry system.

In addition to Full HD video, full-duplex audio and intuitive touchscreen operation, it enables remote call handling and door release using the VDP Connect app. The Tuya SmartLife app can also be used for customers using other smart home devices.

The monitor also supports intercom communication, live viewing of connected door stations and IP cameras, and complete system configuration directly from the display, providing a connected solution for modern residential installations.

Key Features

- 7" HD touchscreen with wide viewing angles for clear visitor images
- Manage your visitors and door unlocking remotely with your smartpone
- Update settings, parameters, and firmware directly from the monitor
- Full-duplex hands-free communication
- Monitor multiple entrances and up to four IP cameras
- Call other monitors within the property for room-to-room communication
- Record visitor images and video, using a microSD card of up to 512GB

Certification

Certification

DEEE

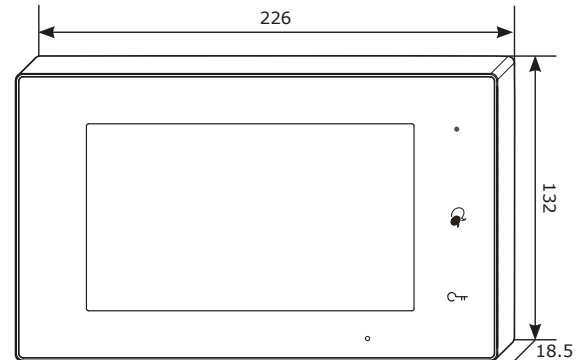

Certification

-10°C to 50°C

Product Specifications

Mounting:	Surface
Mounting height:	145 to 160 cm
Technology:	Hybrid solution of IP communication running through 2-wire cables
Screen size:	7" IPS full view angle TFT
Resolution:	1024 x 600 px
Memory:	512GB through SD Card (not supplied)
Weight:	422 g

Electrical Specifications

Power input:	20-28 Vdc
Consumption:	Standby: 1.5W In operation: 4W
Cable type:	2-wire (recommended: 16AWG, Belden 8471) or Cat5

Accessories
